Greenway Home Products expands Water Treatment Business

March 12, 2010

Guelph, ON - Greenway Home Products announced yesterday that it is further expanding its Water Treatment business and has established a new operating Division; **Greenway Water Technologies**.

Focused on the wholesale plumbing, OEM and light commercial/industrial channels, Greenway Water Technologies is positioned to provide innovative water solutions to wholesalers, water treatment professionals and distributors in North America.

“The growth and expertise we have acquired in water treatment manufacturing and assembling over the last decade has built a solid foundation for Greenway Water Technologies to effectively provide existing and advanced water solution products and services to water treatment professionals and wholesalers in North America” says Doug Greenway, President.

Certified Water Specialist Laura Greenway-Balnar has been appointed Director, Greenway Water Technologies to manage the newly created Division which will include expanded manufacturing and assembly operations in Guelph to meet the growing demand. Laura was formerly Product Manager of Water Treatment at Greenway Home Products.

Greenway Home Products is a diversified Home Products Company that designs, develops, manufactures and distributes a broad line of water, heat, and home products. Headquartered in Guelph, Ontario, with branch locations in Perrysburg Ohio and Suzhou China, brand names include Greenway, Vitapur, Polar, Watermaxx, Muskoka as well as several other national private labels.
